

EkoCity Product Family

EkoCity product family

- **The EkoCity product family consists of four different products:**
 - EkoCity 120
 - EkoCity 240
 - EkoCity Flow 120
 - EkoCity Flow 240
- The EkoCity 120 and 240 sorting bins are equipped with a foot pedal and a lid on top of the bin; the lid can also be opened manually.
- The EkoCity Flow 120 and 240 are equipped with open sorting openings and have no pedal or lid.
- All EkoCity products are designed to fit 120L or 240L wheeled inner containers.

All products in the EkoCity family can be equipped with a fill-level sensor and connected to the Finbin Connect cloud service.

EkoCity 120 and 240

- Available in two-tone design – the color of the lid can be used to guide sorting
- Standard stickers: Modul sorting stickers
- Large surfaces for stickers allow for impressive customized labels

EkoCity Flow 120 and 240

- Available in two-tone design
- Standard stickers: Modul sorting stickers
- Large stickerable surfaces allow for impressive customized labels
- Sorting openings available in line with the Loop product family, as shown in the image below

Product features and customer benefits

EkoCity 120 and 240

Closable lid on top: prevents odors from spreading and ensures more hygienic use

Two ways to use: can be opened either manually or with a foot pedal, increasing user-friendliness

Hygiene and ease of use: the foot pedal allows hands-free opening

Tight structure: suitable for locations where protection against birds and rodents is required

Versatile placement: especially suitable for outdoor environments that require a secure and tight structure

EkoCity Flow 120 and 240

Open throw-in openings: customizable for different waste fractions to guide sorting

Clear sorting guidance: the shape and size of openings reduce incorrect disposal

Light and easy to use: ideal for locations where a closable lid or foot pedal is not required

Visual guidance: the shape of the openings also serves as a sign for correct waste identification

Indoor suitability: ideal for spaces where structure tightness is not critical but sorting guidance is important

Shared Benefits – All Models

Modularity and versatility: can be used as standalone bins or combined into complete sorting stations

Two size options: 120 L and 240 L for different capacity needs

Smart waste collection: bins can be equipped with a fill-level sensor and connected to the Finbin Connect cloud service

Modern and clean design: fits into a variety of environments

High-quality construction: a durable and long-lasting solution for both public and private spaces
